### 4K HDBaseT Output Board with Analog Audio and Remote Powering

Part No: 9122 0050

#### Features

- HDMI 1.4 compliant video output over HDBaseT with a resolution of up to 4K / UHD (30Hz RGB 4:4:4, 60Hz YCbCr 4:2:0)
- Pass through of 4:2:0 3840x2160@60 Hz video
- Support for HDMI 1.4 embedded uncompressed LPCM audio or compressed high bitrate audio (LPCM, AC 3, MPEG1 Layer 1, MPEG1 Layer2, MPEG1 Layer 3, MPEG2, AAC, DTS, ATRAC, Dolby Digital+, DTS HD, Dolby Digital TrueHD, DST, and WMA Pro, Dolby Digital EX, Dolby Digital Surround EX)
- De embedding of IEC 60958 1 (only stereo LPCM), and IEC 61937 (only AC 3, Dolby Digital Plus, Dolby Digital EX, Dolby Digital Surround EX, DTS, DTS ES)
- Video test pattern generation
- Cable length and link quality estimation
- Frame detector functionality with frame rate, color space, pixel clock rate, and active and total area detection
- HDCP 1.x support
- Deep color support for up to 36 bpp
- Automatic Ethernet only mode support when an Ethernet only device is connected
- Extension for up to 170 meters over CAT7e depending on the video clock used
- Remote powering according to IEEE 802.3af-2003 with increased output power

Featuring eight HDBaseT 1.x output ports, the board is compatible with the full range of Lightware TPS extenders and HDBaseT compliant 3rd party transmitters. The HDBaseT technology provides a transparent medium for all video, audio, data and control signals in line with the 25G multilayer architecture and allows for a cost effective extension solution for up to 170 meters.

The A3 add on has bi directional configurable Phoenix connectors. The digitized audio from the add on can be embedded either to the output HDMI signal or to the Return Audio Layer. Moreover, IEC 60958 1 audio either from the HDMI signal or the Forward Audio Layer can be routed to the add on output.

The board provides remote powering for extenders according to the PoE specification (IEEE 802.3af-2003) but with increased output power of 25.4W. Remote powering does not require an external power source other than that of the 25G matrix switcher.

#### Supported Media Layers:

- Video layer with embedded audio
- Forward Audio Layer
- Return Audio Layer
- Ethernet layer
- USB KVM layer
- Infra layer
- Consumer Electronics Control layer
- RS-232 & RS-422 control layer
